Implemented federated learning framework with pytorch. Experimented preprocessing long input for LLMs. Reproduced existing paper to handle clients with only positive label, and tested the performance with various dataset (FeMNIST, CIFAR10, Human activity recognition). Pre-training LLMs with large corpus (BERT, RoBERTa) and

distillation of pre-trained model into small models (DistilBERT). Did the experiments about resource efficiency (computation, memory, battery) on various mobile devices. Contributed to writing.
